---

## Career Objective

Seeking opportunities in Machine Learning and Artificial Intelligence to apply technical knowledge, problem-solving skills, and innovative ideas in real-world applications.

---

## Education

**B.Tech (Pursuing)** – Specialization in Artificial Intelligence & Machine Learning  
[University Name] | [Year of Graduation]

---

## Skills

- **Programming:** C, C++, Python (NumPy, Pandas, Matplotlib), React Native
  - **Machine Learning & Data Science:** EDA, Data Preprocessing, Visualization, Regression (Linear, Logistic, Multivariable), Neural Networks, TensorFlow
  - **Tools & Technologies:** AWS, Git, Jupyter Notebook
- 

## Projects

- **Hospital Management System (C):** Developed a system for managing patient, doctor, appointment, and billing information.
  - **IPL Data Analysis (Python):** Analyzed and visualized IPL match data using Pandas, NumPy, and Matplotlib.
  - **House Price Prediction (Kaggle):** Built regression models for predicting house prices based on various features.
  - **Neural Networks (TensorFlow):** Implemented basic neural network models for classification tasks.
  - **AI Solution – SIH 2025:** Created an AI/ML-based prototype with performance metrics and feasibility analysis.
- 

## Certifications

- AWS Certified
- NPTEL – IIT Kharagpur
- Robotics Workshop Certificate

---

### **Hackathons & Competitions**

- **Smart India Hackathon (SIH) – Internal Round:** Selected to represent the institute; collaborated on designing an AI/ML solution; certificate awarded.
- 

### **Extracurricular Activities**

- Participated in hackathons, coding competitions, and tech events.
- Held leadership roles in college clubs and organized events.
- Engaged in sports and fitness activities to build teamwork and discipline.
